Revised: January 8, 2004
October 8, 2010
September 18, 2013

Contact for Info: ECU HIPAA Privacy Office, 252-744-5200

1. Purpose

1.1. This policy applies to East Carolina University’s Health Care Components (“ECU Health Care Components”) that create or maintain Protected Health Information (“PHI”). The purpose of this policy is to provide guidance on how to accommodate an individual’s reasonable request to have his/her PHI that is created or maintained within an ECU Health Care Component communicated to an alternate location or by an alternate means.

2. Policy

2.1. ECU’s Health Care Components must permit individuals to request and must accommodate reasonable requests by individuals to receive communications of PHI from a Component by an alternative means or at alternate locations.

2.2. ECU Health Care Components may require the individual to make a request for a confidential communication in writing by using a Request for Alternate Communication form.

2.3. ECU Health Care Components may condition the provision of a reasonable accommodation on:

2.3.1. When appropriate, information as to how payment, if any, will be handled; and

2.3.2. Specification of an alternative address or other method of contact.

2.4. ECU Health Care Components may not require an explanation from the individual as to the basis for the request as a condition of providing communications on a confidential basis.
3. **Procedure**

3.1. **Designation.** ECU Health Care Components must designate an individual or office that will be responsible for receiving a request for alternative communication, determining if a particular alternate communication request is reasonable, responding to an individual’s request, and assuring that the coordination and documentation of an approved request is completed and implemented.

3.2. **Coordination.** ECU Health Care Components will ensure that they appropriately coordinate all systems that support or produce PHI to reflect any acceptance of alternate location and/or alternate means of communication.
